

Project Value: **£900k**

Location: **Birmingham**

Project Duration: **12 weeks**

In order to provide the adi Group with high-end offices and manufacturing space, we undertook the in-house design and build of the Group's head office in Birmingham.

This required concept design and space planning in the first instance, ensuring buy-in from key stakeholders along the way.

Once agreed, we developed the detailed design and completed the building refurbishment in 12 weeks.

Works included:

- A new mezzanine to create a two storey facility
- 2 large open plan office areas
- Suite of flexible meeting room space with touchscreen technology, wireless display technology and video-conferencing
- Kitchen facilities and break-out areas
- Display area for corporate messages and branding
- Electrical workshop area for control panel assembly
- Mechanical workshop areas for metal work fabrication
- PLC software testing area facilities
